MANAGEMENT DISCUSSION AND ANALYSIS REPORT

I. Company

The operations in the Weaving and Processing departments of Textile Unit of the Company continued during the year. However, desired results could not be achieved due to old age of plant and workforce resulting into low productivity, higher wastage of materials and production of damaged fabrics. Steps have been taken for replacement of old machines and induction of young work force. Some machines were received and installed during the year and some more machines were ordered during the year and yet to be received and installed. In the real estate segment, plans are in place for development of one property in near future.

II. General Review

The Indian Textiles Industry plays an important role in the growth of the Indian economy. Apart from providing one of the basic necessities of life, the textile industry also plays a pivotal role through its contribution to industrial output, employment generation, and the export earnings of the country. The Indian textile industry is extremely varied, with the hand-spun and handwoven sector at one end of the spectrum, and the capital intensive, sophisticated Mill sector at the other. The decentralized power looms/hosiery and knitting sectors make the largest contribution in the textile industry. The close linkage of the industry to agriculture and the ancient culture, and traditions of the country make the Indian textiles sector unique in comparison with the textiles industries of other countries. This also provides the industry with the capacity to produce a variety of products suitable to the different market segments, both within and outside the country.

Textile Modernization Fund created by Government of India has been boon for Textile Industry. The Companies have gone for bigger capacities, modernization and diversification of product range by availing loan under the fund. Many of the Mills are now predominantly catering to RMG & Export segments. Some of them have gone for forward integration in garment manufacturing for domestic as well as export market. Huge expansion has taken place in capacity for specialized fabrics like Denim. Demand for premium fabrics with cotton content has

increased. Vast technological developments have taken place in processing and different types of finishing of fabrics. Technical Textiles has emerged as an independent segment throwing immense opportunities in Textile Industry. The Company has to cope up with all these developments due to gap of twenty years. It could not take advantage of Textile Modernization Fund, being a sick industrial undertaking. Yarn prices moderately came down during the current year but export of large volumes of cotton was a dampener. There is tough competition with low cost producing neighbouring countries, independent large power loom units besides the peculiar problems faced by the Company for production of quality and value added fabrics to cater to the ever demanding market.

III. Opportunities and Challenges

RMG manufacturing segment has come up in a big way in recent past. Similarly cotton fabrics are in high demand in premium segment. The Company has installed new machines in processing department for processing of cotton fabrics. Power situation in the State is too bad coupled with high cost of power. Order has been placed for new fuel efficient boiler. Majority of the workmen in the textile unit are in their 50s and are not able to give desired productivity and quality products. The gap is being met by induction of fresh personnel. Orders have also been placed for singeing machine, brush sueding & emerizing machine and second hand air jet looms under EPCG Scheme.

IV Cautionary Statement

Statements in this Management Discussions and Analysis Report which seeks to describe the Company's expectations or predictions, may be considered to be 'forward looking statements' within the meaning of applicable security laws or regulations. However, actual results could or may differ materially from those expressed or implied. Important factors that could make a difference to the Company's operations also include global and Indian demand supply conditions, obsolescence of machinery, availability of spare parts for machinery, delivery schedules and commissioning of new machines on order, levels of productivity achieved, changes in government regulations, tax regimes, economic developments besides other factors such as litigation and labour matters.
